

THE BAY BRIDGE IS CLOSED FOR EMERGENCY REPAIRS

THE SAN FRANCISCO-OAKLAND BAY BRIDGE REMAINS CLOSED FOR EMERGENCY REPAIRS

Caltrans District 4 remains closed both directions of the bridge Tuesday evening to repair the crossbar and high-strength tie rods that came loose from the eyebar assembly put in place during Labor Day weekend.

Commuters can get real time travel information from **511.org** or by calling 511. All traffic is being diverted to other bridges. Motorists are advised to expect delays, use alternate routes, and plan ahead for the evening and morning commutes. The public is encouraged to arrange for telecommuting or staggered work schedules if possible.

Caltrans is working with transit partners to assure that enhanced services are available during the closure. BART is running longer and extra trains. Extra service is available on the Oakland-Alameda and Golden Gate ferries. Transbay AC Transit service is detouring to four East Bay BART stations (North Berkeley, MacArthur, West Oakland and Coliseum) so that passengers can continue to San Francisco on BART.

Residents of Treasure Island can access their homes via the San Francisco side of the bridge; CHP is requiring proof of residency. The MUNI 108 bus line to Treasure Island is providing regular service.

Call 511 or visit 511.org for traffic conditions, transit options and detour information.

For the latest updates, go to the **Caltrans Web** site (<http://http://dot.ca.gov/dist4/>) and **Twitter** (<http://twitter.com/baybridgeinfo>).
